Flash Point: See heading 9

Fire extinguishers media:

- suitable: Foam, carbon dioxide (CO₂), powder
- not recommended: Do not use water jet (stick jets) for extinguishing fire since they could help to spread the flames.

Specific hazards: Incomplete combustion and thermolysis produce gases of varying toxicity such as CO, CO₂, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled.

Protective measures for firefighter: Insulated breathing apparatus must be worn in confined premises with heavy concentrations of fumes and gases.

6. Accidental Release Measures

See sections 8 and 13

After spillage / leakage:

- on the soil: Surfaces on which the product has been spilled may become slippery.
Do not allow the product to enter sewers or rivers or contaminate the soil.
Recover with mechanical means such as pumps and skimmers.
- on water: Floating absorbent material, then mechanical recovery.
If the product is spilled in a river or in the sewers, notify the authorities of the possible presence of floating items.

7. Handling and Storage

HANDLING:

- Prevention of user exposure: Ventilate extensively if the formation of vapour, fumes, mist or aerosol is a risk.
Make all the necessary arrangement in order to reduce exposure risk, notably to product in use or to wastes.
Keep away from combustive substances; keep away from food and beverages
- Prevention of fire and explosion: Empty containers may contain flammable or explosive vapours
There is a fire hazard associated with rags, papers or any other material used to remove spills which become soaked with product.
- Precautions: Avoid static electricity build up with connection to earth.
Set up machinery and equipment so as to avoid the risk of accidental spills or splashes onto hot machine parts and electrical contacts (on joints failure, for example).

STORAGE:

- Technical measures: Make the necessary arrangements to prevent water and soil pollution
- Storage conditions:
